**Innovate Like a Swede:**
**Template for criteria**

Jury members have an office responsibility to make non-partial selections. To ensure a maximum of transparency in the grading process, the following template will be used.

A project can earn a maximum score of 105 points. A project is judged using five different criteria. A score from 1 to 5 is assigned (1 being the lowest score). The score for each criterion is then multiplied by the factor (0) assigned to each criteria.

**Assessment Criteria**
- Innovative and creative (5)
- Impact on the Sustainable Development Goals (5)
- Feasible; technically and commercially (4)
- Sustainable in a long-term perspective in ecological, social and economic terms (4)
- Clear, coherent and readable application (3)

Innovative and creative (5)
- Is the project proposing innovative solutions to unsolved problems?
- Does the application show the creativity of the project in relation to:
  o How to pose a problem
  o How to solve a problem
  o Analysing data
  o Experiments or investigations
  o How to mediate and make the affected parties aware of the problem.

- Is the project scientifically relevant (can the scientific level be related to basic, applied research and are the results direct applicable for implementation)?

Impact on the Sustainable Development Goals (5)
- Does the project target an important challenge within SDG9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation in Vietnam?
- Are expected results presented convincingly?
- Is there adequate information upon which to draw conclusions?

Feasible; technically and commercially viable (4)
- Is there a clearly defined idea on which a result can be achieved?
- In what way has limitations been addressed?
- Have the possible misinterpretations of the data been taken into consideration?
- How well has the commercial aspect been presented?

Sustainable in a long-term perspective in ecological, social and economic terms (4)
- Is the application clear on overall relevance for both environment and society?
- Can the project contribute to the improvement of the quality of a) environment, b) life for people?
- How well is the long-term perspective taken into consideration (including climate change)?

Clear, coherent and readable application (3)
- Is the problem well defined?
- Is the content of the work well structured?
- Is the application written in acceptable English?

Plagiarism, meaning the use of, for example, someone else's work, words, ideas or research without the approval of the original producer, is not allowed in any way. Please note that this exemplification of

actions that could constitute plagiarism is not intended to be exhaustive. In order to ensure that this is respected by the contestants, all shortlisted submissions will be screened for plagiarism.
